**the first 24 hours
 of critical care**

Fundamental Critical Care Support (FCCS) Course

Because the first 24 hours of critical care are so crucial

Currently taught in more than 27 countries, Fundamental Critical Care Support (FCCS) is the only recognized course that provides basic critical care skills to the non-intensivist health care provider. With over 6,000 professionals trained annually, FCCS ensures that patient care staff has the confidence and skills to treat the critically ill until intensivists become available.

Participants who complete the course should be able to:

- Immediately assess the need of critically ill patients.
- Identify appropriate diagnostic tests for critically ill.
- Respond to significant changes in the unstable patient.
- Initiate management of acute life-threatening conditions.
- Recognized the need for expert consultation and/or patient transfer.

Participants will receive copies of the newest edition textbook Fundamental Critical Care Support
